

Pilgrims School

Administration of Medication

January 2024

Next review date: January 2025

Administration of Medication Policy

Please note: 'The School' refers to Early Years (Little Pilgrims, Kindergarten and Pre-School) and Pilgrims main school.

Staff at Pilgrims School will only administer medicines in school when it would be detrimental to the child's health not to do so, and only within the guidelines laid out in this policy.

Parents should provide full information about their child's medical conditions including the full details on medicines their child needs.

Staff should be confident to ask any questions they consider to be appropriate to establish whether medicine can be administered to the child whilst at the setting. If staff are unsure about any procedures, or have any concerns related to administering medicine to a particular child, they should not administer the medicine, and raise any issues with their Line Manager.

Prescribed Medicines

Many children will need to take medicines during the day at some point during their time at Pilgrims School. However, this will usually only be for a short period, perhaps to finish a course of antibiotics or to apply a topical medication. Medicines should only be brought into the school setting when essential; that is where it would be detrimental to a child's health if the medicine were not administered during the school or setting day. Pilgrims School will only accept medicine that has been prescribed by a UK registered prescriber. No child under 16 will be given prescription medicines without the parental consent from a parent. A 'Permission to Administer Medicine Form' must be completed and authorised in all instances (see Record Keeping below).

- Medicines for main school children that need to be taken three times a day should be taken in the morning, after school and at bedtime and will not be administered during school hours, the exception to this rule is when a child is attending Larks, Owls or after school clubs. This does not apply to early years children.
- The school can only accept prescribed medicines that are in date, labelled, provided in the original container as dispensed by a pharmacist and include instructions for administration dosage and storage. The exception to this is insulin which must still be in date, but will generally be available inside an insulin pen or a pump, rather than in its original container;
- Medicines should only be administered as directed on the prescribing label. If a parent requests that this is varied (i.e. larger dose to be given to the child), staff should explain it is not possible to vary from the prescriber's instructions;
- When no longer required, medicines should be returned to the parent to arrange for safe disposal.

Controlled Drugs

The supply, possession and administration of some medicines are controlled by the Misuse of Drugs Act, for example ritalin (which is used in the treatment of ADHD). Controlled drugs must be stored and dealt with in a specific way.

- If a child has been prescribed a controlled drug this must be stored in a locked non – portable container and only named staff should have access. A record should be kept of any dosages used and the amount of the controlled drug held in school
- Controlled medication for school trips must be kept in a locked container and it is the responsibility of the trip leader to ensure it is held securely throughout the duration of the trip.
- Controlled drugs should be returned to the parent when no longer required for them to arrange for safe disposal.

Non-Prescription Medicines

Children under 16 should **never** be given non-prescription medicines without their parents' written consent. Non-prescriptive medication will only be administered at school in exceptional circumstances and their use will be reviewed after seven days. If there is a longer requirement for use of non-prescription medication, the school nurse will advise on the long term strategy for the child.

In exceptional circumstances (authorised by the Headteacher/ Deputy Headteacher, Early Years Operations Manager or School Nurse only) the administering of non-prescribed medicine will be permitted e.g. in case of an emergency if a parent is on their way to collect a sick child. Consent in this case may be obtained verbally from the parent. In such instances, written confirmation from the parent confirming the verbal consent **must be obtained** as soon as possible after the event.

- Staff should check that the medicine has been administered without adverse effect to the child in the past;
- A child under 16 should never be given medicine containing aspirin unless prescribed by a doctor;
- All medicines must be stored safely. Given the age of the children attending Pilgrims School, access to any medicines directly by children is not allowed and must be via a competent adult who is authorised to administer medicines.

Paracetamol

If a child requires regular doses of a paracetamol-based product i.e. Calpol, the parent should be advised that this is not possible and the child should remain at home until they are well enough to attend school without the need for medication.

Long term Medical Needs

It is important that the setting has sufficient information about the medical condition of any child with long-term medical needs.

Pilgrims School is committed to supporting all pupils with medical conditions, and information and guidance on how Pilgrims School will do this is contained in the Supporting Pupils with Medical Conditions policy in conjunction with the SEND Code of Practice.

Record Keeping

It is essential that written records are kept of all medicines administered to children by members of staff. Records offer protection to staff and children and provide evidence that the procedures have been followed.

If it has been agreed that medicine will be administered to the child whilst at the setting, a 'Permission to Administer Medication to a Child During School Time' form must be completed and signed by the parent/guardian (See Appendix 1). The form must be authorised by either the Headteacher, Deputy Headteacher, Pre-School Manager, Little Pilgrims' Manager/ Deputy Manager or School Nurse prior to the acceptance and administering the medicine. This form is only valid for the academic year in which it is signed, a new form must be completed every academic year.

It is a requirement that if a medicine is administered to a child in line with parental requests, that the parents are informed that this has happened on the day that the medicine is administered (or as soon as reasonably practicable). A signature should be obtained from the parent to confirm this, and this signature must be recorded on the Issuing Medicines to a Child (appendix 2 or 3). For short term prescribed medicines (e.g. antibiotics) this will mean obtaining a parental signature on a daily basis until the course has finished. For prescribed medicine taken on an ad-hoc basis (e.g. inhalers and allergy medication) a signature will need to be obtained on the days when a dose has been administered.

A copy of the completed form needs to be kept with the medicine and a copy placed in the child's file.

Procedure:

- A risk assessment will be undertaken in Little Pilgrims for all administration of medicines and, only where appropriate in main school.
- Parents will complete a "Permission to Administer Medicine" form (Appendix 1). The completed form should then be authorised by the appropriate Manager.
- All medication must be clearly labelled with the child's name and dosage and in its original container, otherwise the medicine cannot be administered
- Medicine which requires refrigeration will be placed in a locked fridge
- Only members of staff named on the "Permission to Administer Medicine" form (Appendix 1) will administer the medication. An additional member of staff is required to check and witness the administration of medicine to the child.
- Details of each dose of administered medicine given to a child will be recorded on "Issuing Medicines to a Child" form (Appendix 2) or "Issuing Controlled Medicines to a Child" form (Appendix 3) **and should be kept with the medicine until no longer required**. This form should then be filed in the child's notes.
- The form should be signed by the person administering the medicines as well as the member of staff who has checked and witnessed.
- A signature from the parent is required on the 'Issuing Medicines to Children' form to confirm that that have been made aware that the medicine has been administered.
- In Little Pilgrims and Pre School the parents should be informed and asked to sign the issuing form when the child is picked up.

- In Main School:
 - **Prescribed medicines – short term course.** The issuing form should go home with the medicine when it is collected and the parent should sign and return the issuing form along with the medicine the next day.
 - **Prescribed medicine taken on an adhoc basis.** The issuing form should be completed by the person administering the medicine and sent home in book bags. The parent should sign the form and ensure that it is returned to school the next day where it will be kept with the medicine.

Storage of Medicine

- In main school, school owned adrenaline auto-injectors and inhalers are kept in a high cupboard behind reception for ease of access in case of emergency, all staff will be aware of location.
- All other medication for main school will be kept in a locked cupboard in the medical room or fridge in the medical room as appropriate.
- In Little Pilgrims all medicines, adrenaline auto-injectors and inhalers are kept in a named individual box/bag on a high shelf and all staff are aware of location. In Pre-School all medicines, adrenaline auto-injectors and inhalers are kept in a box/bag and all staff are aware.
- Prescribed or parent provided medication will be stored in a red bag personally assigned to the child, this will be kept in the classroom in a central location

Refusing Medicine

If a child refuses to take medicine staff should not force them to do so but should note this in their records. Parents should be informed as soon as possible, thus giving them the option of coming in and administering the medicine themselves.

Disposal of Medicines

Staff should not dispose of medicines. Parents are responsible for ensuring that date expired medicines are returned to a pharmacy for safe disposal.

Common medical conditions requiring medication

The medical conditions in children that most commonly cause concern in schools and settings are asthma, diabetes, epilepsy and severe allergic reaction (anaphylaxis). It is important that the needs of children are assessed on an individual basis. Further information on dealing with these is provided in the Supporting Pupils at School with Medical Conditions Policy. These children will have an individual health care plan (IHCP) drafted and implemented by their keyworker who is supported by the school nurse.

Staff Medication

If a member of staff requires medication whilst working, this must be kept in a locker or fridge in the staffroom. If this is not possible and the medication needs to be carried on their person, this should be done so in a secure bag and always out of the reach of children.

Changes in Medical Information

Staff – If there is a diagnosis or change in medical information, the staff member's Manager or the Headteacher should be informed. If this change has not been picked up during a back to work interview, records should be updated and liaison if necessary with the appropriate staff, i.e. Occupational Health, Health & Safety Officer or School Nurse.

Children – If a parent informs the school of a change of medical information or provides new medical information, this must be in writing and dated, the information must then be passed to the School Nurse in order that iSams is updated and all associated staff informed.

Approved by the Health and Safety Subcommittee on:

Jonathan Bennett

Estates and Facilities Manager

**PERMISSION TO ADMINISTER MEDICATION TO A CHILD
DURING SCHOOL TIME**

To be completed by parent / guardian **prior** to medicine being given at School.
 NB: Medicines can only be accepted in original container as dispensed by the pharmacy.
This form is only valid for the academic year in which it is signed. A new form must be completed each academic year.

NAME :	CLASS :
REASON FOR MEDICATION (e.g. ear infection) :	
NAME OF MEDICATION / TYPE OF MEDICATION (e.g. Amoxicillin, antibiotics)	
DOSAGE AND METHOD OF ADMINISTRATION (e.g. 5mls by mouth)	
WHEN TO BE ADMINISTERED (e.g. Specific time or pre / post specific activity)	
HOW LONG TO BE ADMINISTERED (e.g. Date when medicine will be finished)	
EXPIRY DATE	
ARE THERE ANY SIDE EFFECTS THAT THE SCHOOL NEED TO KNOW ABOUT?	Yes / No
If yes, please specify:	

The above information is accurate at the time of writing and I give consent to the school staff administering the medicine in accordance with the school policy. I will inform the school immediately, in writing, if there is a change in dosage or frequency of the medication or if the medication is stopped.

I understand that whenever a dose has been administered a form will be sent home to confirm that I am aware that the medicine has been administered to my child as per my instructions. I will return this to school the next day.

APPENDIX 2

ISSUING MEDICINES TO A CHILD

This form should be stored with the medicine at all times.

Main School - Once a dose has been given the form should be sent home to parents either (i) with the medicine or (ii) via book bags.

The parent must sign and return the form to school on a daily basis.
